

Dear all

One item today – a post-doctoral fellow opportunity for someone with a background in hydrogeology at CSIRO Land and Water and Flinders University.

If you would like something included in this digest please email it to office@mssanz.org.au

kind regards, Karen

Research Associate in Hydrogeology

Flinders University and CSIRO's Deep Earth Imaging Future Science Platform are seeking a post-doctoral research fellow with a background in hydrogeology to help develop, test and implement a workflow for regional water table mapping. The 3-year research project will focus on developing a regional conceptualisation of the groundwater flow system and use that understanding to integrate point measurement (e.g. bores), local scale proxies (e.g. hydrogeophysics) and regional scale proxies (e.g. remote sensing).
