

Dear all

This week we have a PhD opportunity from the University of Melbourne in collaboration with the University of Washington. Details below.

kind regards, Karen

Subject: PhD project: A Spatial Network Approach to Maintaining River Basin Ecosystem Values and Managing Hydrological Threats

Content: An exciting PhD project is available for a motivated and suitably qualified candidate to undertake original research in a multi-disciplinary area. You will work with a dynamic and industry-aligned team to explore the potential to apply conservation planning principles to water resource management. Your findings will inform the water industry and contribute to the international body of knowledge. You will be supervised by Dr Avril Horne and A Prof Angus Webb (University of Melbourne), and Prof Julian Olden (University of Washington).

For further details, including the Expression of Interest Process, please see <https://nrmjobs.com.au/jobs/2020/20005650>

Applications close July 17, 2020.
