

Dear all

In this week's digest:

- CSIRO has a postdoctoral fellow position available with the Agroecology team in Brisbane, looking at forecasting and managing pest outbreaks, closing date is 14 July <https://research.csiro.au/agroecology/postdoctoral-fellowship/>
- The Hydrological Modelling team at the Bureau of Meteorology has two positions advertised:
 - [Hydrologist](#) – with a focus on continental-scale surface routing within gridded modelling framework
 - [Hydrologist](#) – a more general position, focussing on improving model physics and parameterisations (knowledge of vegetation dynamics modelling would be an asset).

Both positions may be offered at APS6 or EL1 employment levels, depending on the skill set and experience of the preferred candidate.

If you would like something included in this digest, please email it to office@mssanz.org.au

Kind regards, Karen
